

Home Energy Assessments

Energize Your Home and Get More Comfort and Savings!

Residential Home Energy Assessments from Energizing Indiana are a smart approach to improve the comfort and efficiency of your home. Home Energy Assessments can help you raise your home's performance, lower energy bills, improve in-home air quality and increase your home's value.

What is included in your Home Energy Assessment?

Energy Advisors will guide you step by step through the process to produce long-term, cost-effective energy savings by analyzing your energy use, recommending appropriate efficiency measures and installing several low-cost energy-saving measures. Advisors will also assess the heating, ventilation and air-conditioning (HVAC) systems in your home to determine if they are operating efficiently. We also may inspect your home's air duct sealing, insulation levels and more to evaluate your home's energy consumption and heating and cooling efficiency.

The Home Energy Assessment may include energy saving measures such as:

- Replacing traditional incandescent bulbs with efficient CFLs (limit nine)
- Installing low-flow faucet aerators (limit three)
- Installing low-flow shower heads (limit two)
- Water heater insulation wrap (on electric water heaters only)

Once your home's energy assessment is complete, you will receive a comprehensive report detailing what can be done to start saving energy and make your home more comfortable. Many times a Residential Home Energy Assessment reveals that only simple and relatively low-cost improvements are necessary to achieve significant energy savings.

Eligibility Requirements:

- Single-family homes, duplexes, triplexes, quadplexes or mobile homes, occupied by the owner
- or**
- Non-owner occupied homes where occupants have the electric service in their name
 - Homes built prior to January 1, 2010
 - Homes that have not had a utility-sponsored assessment in the last three years

Weatherization services are available for income-qualified homeowners.

Community Outreach and Enrichment

In an effort to give back to the community, nonprofit organizations in Indiana can enroll in a rebate program. For every member who completes a Home Energy Assessment, the non-profit organization will receive \$25.

Contact the non-profit organization to learn more.
